Web Developer

Astute and highly analytical professional, with Degree in IT; Enthusiastic in securing a project and knowledge in improving code quality and strengthening UI/UX

- Core Competencies -

- Basic Web (HTML, CSS, JS, PHP)
 - Front-End development (React.js, Next.js)
 - Back-End development (Node.js, Flask, Django)
 - Database (MongoDB, SQL, SQLite3)
 - Collaborative working (GIT)
 - Data Algorithm (Leetcode, NumPy, Pandas)
-

PROJECT EXPERIENCE

Meraki-Wrap (MERN Stack) - [Meraki-bay.vercel.app](https://meraki-bay.vercel.app)

As my inaugural project utilizing the MERN stack, I embraced the role of a full-stack developer, which allowed me to:

- ♦ Develop a frontend that is not only functional and dynamic but also fully responsive
- ♦ Implement an Admin Dashboard that integrates directly with the backend database

ABC Property (HTML, CSS, Node.js, MongoDB) - [ABCProperty.vercel.app](https://abcproperty.vercel.app)

Designed as a dynamic website for the ABC Property company, this project was part of my academic assessment and featured:

- ♦ Integration of a payment gateway using Stripe for booking property visits
- ♦ Development of a form input system that collects data and exports it to Excel

Digital Agency Website - [Edoyang.github.io/digital-agency](https://edoyang.github.io/digital-agency)

My first personal project, where I demonstrated my capability to:

- ♦ Accurately develop a website template from designs on Figma, PSD, or Dribbble, with a keen focus on responsive design to ensure optimal display on all devices.
 - ♦ Enhance functionality and user experience by identifying and resolving issues, as well as improvising additional features to elevate the project's quality.
-

EDUCATION & CREDENTIALS

KENT Institute, 10 Barrack Street, Wynyard (Diploma of Full stack web developer IT)
The program equipped me with comprehensive web development skills.
